

Running Bear Giclee Printing

A new service is now being offered by Running Bear Productions. We now offer fine art giclee printing and graphic services. All aspects from capturing the image to the final print are now available. Only the highest quality materials and inks are used. We will work closely with each artist to achieve the end product that you are looking for! If you already have high quality digital files, we can work from those, or we can scan your images, slides or transparencies into the computer and make all necessary adjustments. Many of you know us and know that our quest in art has always been color and light. With that knowledge, over 40 years in the art field and over 20 years of computer skills, we will produce for you a final project that meets our own demanding standards before you ever see a proof!
